SAFETY PROGRAM

Delta Innovative Services seeks to lead the way in roofing safety. The goal of the safety program is to reduce injuries and maintain compliance with OSHA regulations. Regular job site safety inspections are conducted by Tom Ruzicka, the Director of Safety. Delta Innovative Services, as part of the safety culture, uses many unique engineering techniques to provide fall protection to employees.

DETAILS

A combination of personal fall arrest systems, guardrails, "Raptors" (fall protection carts), and "Skynets" are used to ensure employee safety from

falls. Employees are provided various in class training sessions that include competent person fall protection, OSHA 10 Hour Certification Training, equipment training, and Hazardous Materials training.

BENEFITS

Delta Innovative Services has a safety committee that meets on a monthly basis to evaluate safety concerns, discuss recent occurrences, and refine

the safety program as a whole. All employees are involved in companywide incentive programs. In this way they are rewarded for safe jobsite conditions and corrected problems.
